Art Unit: 2193

#### DETAILED ACTION

Claims 1-25 are pending and have been examined.

## Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 07 April 2004 has been considered by the examiner.

## Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 17-22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims recite a "computerized system" which under reasonable interpretation may simply be software *per se*. The system does not include hardware.

#### Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Application/Control Number: 10/757,975

Art Unit: 2193

5. Claims 1-25 are rejected under 35 U.S.C. 102(a) as being anticipated by **Notani** et al. (USPN 6,567,783 B1).

Page 3

#### Claim 1

**Notani** disclosed a computerized method for collaborating over a network to manipulate a design using a plurality of heterogeneous user applications running on respective clients connected to the network (column 1, lines 50-55), said method comprising the steps of:

connecting a session client process to a session manager over the network to participate in a collaborative session (figure 14, column 15, lines 17-33);

sharing session control messages with other session client processes connected to said session manager (figure 14, column 15, lines 17-33);

loading design data representing said design into a local application running on said client (figure 14, column 15, lines 17-33);

creating at least one application state file representing at least one application state of said local application based on at least one manipulation of said design using said local application (figure 14, column 15, lines 17-33);

communicating said at least one application state file from said session client process to said other session client processes via said session manager (figure 14, column 15, lines 17-33); and

Art Unit: 2193

loading at least one application state file created by other local applications and communicated from said other session clients via said session manager (figure 14, column 15, lines 17-33).

#### Claim 2

**Notani** disclosed the method of claim 1 wherein said at least one application state is encoded using normalized XML structures to create said at least one application state file, and wherein said at least one application state file is communicated as an XML message (column 3, line 55; and column 7, lines 47-49).

#### Claim 3

**Notani** disclosed the method of claim 2 wherein said XML structures are based on domain specific conventions defined in the context of the type of design data (column 3, lines 44-45).

#### Claim 4

**Notani** disclosed the method of claim 1 further comprising saving said session controls and said at least one application state file in a journal file (column 14, lines 39-42; figure 14).

Application/Control Number: 10/757,975

Art Unit: 2193

<u>Claim 5</u>

**Notani** disclosed the method of claim 1 further comprising the step of

Page 5

scheduling said collaborative session (column 14, lines 39-42).

<u>Claim 6</u>

**Notani** disclosed the method of claim 1 further comprising the step of

conducting a text-based conversation with said other session clients (column

14, lines 39-42).

Claim 7

Notani disclosed the method of claim 1 further comprising the steps of logging

in to said collaborative session and logging out of said collaborative session

(column 14, lines 39-42).

Claim 8

Notani disclosed the method of claim 1 further comprising the step of

controlling the loading of said application state file at a time selected by the

user (column 14, lines 39-42).

Claim 9

Notani disclosed the method of claim 1 further comprising the step of

displaying design manipulations corresponding to said application state file

Art Unit: 2193

created and communicated by said other application files (figures 10 and 11).

Claim 10

**Notani** disclosed the method of claim 1 wherein said design is manipulated without having to transmit design images between said heterogeneous applications (column 3, line 55, using these standards).

Claim 12

**Notani** disclosed the computerized method of claim 11 wherein said method is an asynchronous method of collaboration (column 6, line 22).

Claim 13

**Notani** disclosed the computerized method of claim 11 wherein said journal file provides interactive instructions when played back on said another computer (figure 14).

Claim 15

**Notani** disclosed the computerized method of claim 14 wherein the step of manipulating said design includes highlighting said design object, and wherein said other of said applications highlights said corresponding design object upon reading said application state file *(column 11, lines 62-65)*.

Application/Control Number: 10/757,975

Art Unit: 2193

### Claim 16

**Notani** disclosed the computerized method of claim 14 wherein said heterogeneous applications collaborate bi-directionally (figure 14, element 212).

#### Claims 11, 14 and 17-25

Claims 11, 14 and 17-25 correspond to claims 1-10 and are rejected in a corresponding manner.

## Correspondence Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Wood whose telephone number is (571)-272-3736. The examiner can normally be reached 10:00am - 4:00pm Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai An can be reached on (571)-272-3756. The fax phone numbers for the organization where this application or proceeding is assigned are (571)273-8300 for regular communications.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained form either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR systems, see http://pair-direct.uspto.gov. For questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)305-3900.
